

COMMERCIAL BIN SWEEP CONTROLLER

BROCK® SWEEP-TRACKER™ SYSTEM *Offers Zero-Bin-Entry Options*

Brock's SWEEP-TRACKER™ Controller Could Revolutionize Your Approach to Bin Unloading

Brock's SWEEP-TRACKER™ System, purchased as part of a new Brock MODEL ABC™ Bin Sweep or retrofitted to an older Model ABC Bin Sweep, provides the first true zero-bin-entry sweep product for the grain storage industry. The SWEEP-TRACKER System could help to revolutionize the bin unloading process by freeing employees from the need to stay with the sweep or the bin.

The Brock SWEEP-TRACKER System:

- ◆ Monitors motor amperage.
- ◆ Automatically controls the sweep drive and slows or even stops the sweep when it is flooded, saving on energy and equipment wear as well as extending service life.
- ◆ Shows the sweep location within the bin, percentage of grain remaining, and more.
- ◆ Can be operated through an externally mounted start/stop button.
- ◆ Can be operated manually to control the sweep drive from the control panel.
- ◆ Can be retrofitted to older Brock MODEL ABC Bin Sweeps or purchased as part of a new Brock MODEL ABC Bin Sweep System. Depending on the age of the sweep, kits are available to retrofit certain older ABC Sweep models as well.

Zero-Bin-Entry Sweep Options

Brock's Model ABC™ Bin Sweep is the only bin sweep that offers you options for zero bin entry. Sweep options include:

- ◆ Remote electrical control of sweep to move the start/stop/flow controls to the outside of the bin.
- ◆ Use of Brock SWEEP-TRACKER™ Controller with PLC (programmable logic controller) automation for remote operation.

Try the BROCK® MODEL ABC™ Bin Sweep System For Efficient, Gentle Grain Unloading

Brock's MODEL ABC™ Bin Sweep is designed to be fully submerged in grain and to operate after gravity will no longer unload a flat-bottom storage bin or silo. This commercial bin sweep system allows flat-bottom bins 30 to 200 feet (9 to 60 meters) to be unloaded as efficiently as hopper-bottom storage bins and silos. Two types of drives are available: wheel drive and crawler track drive.
